

MOBIL LUBRICANTS

Izegem, Belgium

ABOUT

Ingelbeen-Soete is the official main distributor of ExxonMobil lubricants for Belgium and Luxemburg. The company is an important player on the regional market, and can rely on the know-how

and experience of ExxonMobil. Ingelbeen-Soete has more than 1.5 million bulk storage capacity, more than 6,000 m² pallet locations and its own fleet of trucks.

PROBLEM

For its brand-new office building and warehouse, Ingelbeen-Soete needed outside impact protection against cars parked along the main building and against frequent in and out forklift traffic. The building's wall materials are very sensitive to perforation,

cracks or other damage caused by vehicles. Not to mention the large glass windows of several meeting rooms on the ground level.

No-one was looking forward to a 2.5 ton forklift driving into a crowded meeting room filled with people.

34.900

Forklifts account for around 85 deaths and 34.900 serious injuries annually.

PROTECTION OF WAREHOUSE AND OFFICE BUILDINGS

High-performance **TB 400** safety barriers were installed along the outer building walls. For design reasons, the customer opted for the color black instead of safety yellow.

COST-SAVING SOLUTION

Smashed windows, damaged walls and doors, etc. The potential consequences of a car or forklift driving into the customer's infrastructure could easily lead to high costs. Fortunately, Boplan's safety barriers guarantee that buildings remain untouched by vehicles. In this particular case, the meeting rooms also remain free from surprise vehicle visits. The black barriers match perfectly with the visual style of these wonderful, brand-new buildings.
