

UNIVER-EXPORT

Novi Sad, Serbia

ABOUT

Univerexport is a Serbian supermarket chain with headquarters and 30.000m² distribution center in Novi Sad. The company was founded on September 25, 1990. In the beginning, Univerexport's

main business was the import of consumer goods. Nowadays, the company's retail chain has 132 stores with 2,062 employees and a revenue of 151.49 million euros.

PROBLEM

A new distribution center should always be protected for the long term. Damage or installations that fail due to forklift impacts should be avoided at all costs, because these would soon have an impact on deliveries.

Univerexport started a search for polymer safety barriers early on. Racks, conveyor belts, gates and much more all needed to be protected against all kinds of vehicle impacts.

34.900

Forklifts account for around 85 deaths and 34.900 serious injuries annually.

Occupational Health and Safety Administration (OSHA)

PROTECTION OF OFFICES, RACKS, GATES AND PALLET CONVEYORS

BO Impact protective posts, **PL Kerb** protection, **CP Corner protector** and **RE Rack End** rack protection were installed across the facility. Univerexport preferred a partner who could cover all types of protection with one range of products. In addition, the products needed to be completely modular and easy to install.

COST-SAVING SOLUTION

Pallets can easily damage walls, racks and gates when driven around on forklifts. The impact of a loaded pallet on any structure can have severe consequences. This was not a risk that the brand-new distribution center in Novi Sad was willing to take. The cost of safety barriers does not weigh up to the repair and replacement costs of many of the expensive installations across the facility. With Boplan's protection solutions, this huge distribution center will be safe and free from damage for years to come.
